$$b = \frac{c \cdot r}{\delta r + \frac{1}{a}}, \quad r = \frac{b}{n} \text{ より}$$

$$b = \frac{c \cdot \frac{b}{n}}{\delta \frac{b}{n} + \frac{1}{a}}$$

$$b \cdot \left(\frac{\delta b}{n} + \frac{1}{a} \right) = \frac{c \cdot b}{n}$$

$$\frac{\delta b^2}{n} = \frac{c \cdot b}{n} - \frac{b}{a}$$

$$\delta b = c - \frac{n}{a}$$

$$b = \frac{c}{\delta} - \frac{n}{\delta a} \quad \cdots (4).$$
